1997 - 2003 City of Tempe Human Services Funding by Service Area

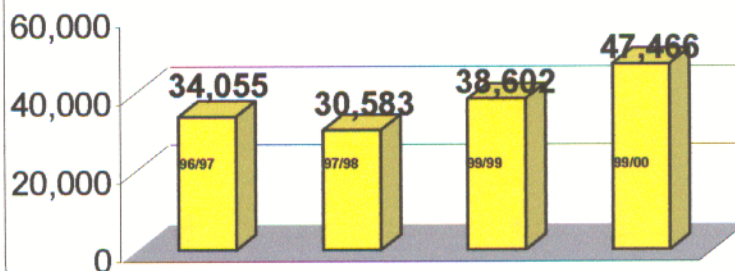

Homeless Persons - The next chart shows the funding for emergency and transitional shelter services to homeless persons plus those for related services such as food, legal and advocacy and homeless prevention from 1999 to 2002. (NOTE: the dollars shown in this chart are *NOT* additional to those included in the above Target Group and Service Area charts).

City of Tempe Funding for Shelter and Related Services to Homeless - 1999- 2002

4. Characteristics of Agency Review Clients - During the Agency Review process, funded agencies supply information on *numbers of Tempe people served*. The chart to the right shows the totals for the years 1996 – 2000. This data has limitations: the numbers are not necessarily unduplicated and some agencies indicate their information is estimated. SACA funding is not represented because SACA applications do not request demographic data. Also, some data was extrapolated, that is, Tempe percentages were applied to the overall caseload numbers reported by the agencies. Finally, homeless are not represented in the totals (by definition, they don't reside anywhere). Over 6,000 homeless were reported by Tempe funded agencies in their overall caseloads, including but not limited to Tempe.

**Estimated Numbers Served -
Tempe Funded Agencies
1996 - 2000**
(not an unduplicated count)

However, the data is useful for purposes of monitoring some important factors, such as **race, income and age**. The following charts show the breakdown for those factors for 1997-2000. (NOTE: not all agencies provided data on these factors).

Race – The chart below shows the makeup of clients served by agencies funded by the City of Tempe for a three fiscal year periods from 1997 through 2000.
